

Officer Safety

“Not a Toy”

The following slides show actual working firearms with individual Duracoat finishes that may lead an officer to believe that the weapon is a “toy”

DuraCoat is a two part chemical coating. Unlike other firearm finishes, DuraCoat was created specifically for firearms.

DuraCoat is permanent. With normal use, a firearm finished with DuraCoat will last several lifetimes.

DuraCoat is dry to the touch in 20 minutes, can be handled in 1 hour and is ready for use overnight.

Although DuraCoat will gain most of its final hardness, elasticity and chemical resistance over a 2-3 week period.
